

Atlas Social Collaboration Datasheet

The most comprehensive suite of cloud based collaboration, mobility, and communication tools in the market, designed with latest social design principles to engage teams around information.

Atlas Social Collaboration

Building productive, collaborative and engaged teams

Atlas is an integrated suite of team tools, where teams, partners and clients can find all the tools they need to share information, coordinate effort and be productive.

A unified environment of team tools

Build Productive and Engaged Teams

Atlas unifies all the tools teams need to be effective. Rather than switching back and forth between productivity tools, teams find all their tools in a seamless environment that makes for greater adoption and more productive teams.

Social tools take teamwork beyond passive information sharing and actively engage people in collaborative processes.

Delivering Simplicity

An exceptionally easy user interface ensures that employees actively use the solution and leverage it to simplify their jobs.

Foster distributed and mobile teams

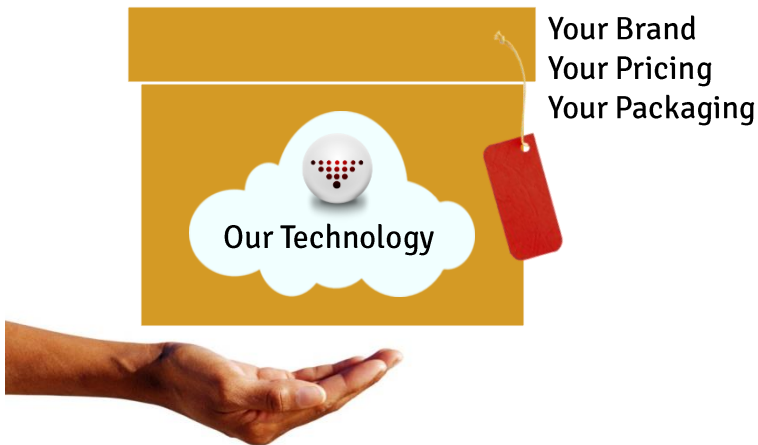

Atlas is a cloud based environment which businesses can use to build effective teams whether the team members are at different offices, working at home, or working from the road.

Rapid results

Atlas is ready to be used right out-of-the-box. Businesses can shift focus from technology and rapidly achieve the business results they were seeking.

Geared for Service Providers

Allows service providers to rapidly enter and profit from the collaboration market

Geared for OEM Partners

Atlas's modular architecture makes it perfect for partners looking to strengthen their technology stack with social, mobile and collaborative capabilities. Atlas is perfect for OEM relationships because:

- We own the entire stack
- HyperOffice was built for the cloud from scratch
- It is massively scalable and extensible
- It has a modern and open architecture
- It has a UI based on latest design & UX principles
- It has an API driven design

A Massive Opportunity

IDC expects the cloud collaboration market to be \$6.2 Billion by 2019. Service providers are perfectly poised to serve this opportunity given their established relationships with businesses and network ownership.

Private Labeling

Private Labeling allows service providers to leverage our best-of-breed technology and launch products under their own brand.

Flexible Deployment

We offer flexible hosting plans where the solution may be deployed from HyperOffice's data centers or data centers of the service providers' choice.

Localization

Our technology is already available in English, Spanish and Japanese, and our resource bundling approach allows us to quickly localize to other languages per service provider requirements.

Rich APIs

Our extensive APIs allow service providers to integrate our collaboration solution with existing services and offer bundled products to their users. We offer out-of-the-box integration with VOIP and video/web conferencing technologies.

Features and Functionality

All the collaboration tools teams need

IM & Presence

Unified search

Modern and elegant UI

Deeply integrated social features

Access across devices

Hey, check out the new cake design I uploaded

Document Management

An online repository where teams can store, share, collaborate on and remotely access documents.

- ✓ Shared online folders
- ✓ Desktop document sync
- ✓ Version control
- ✓ Online document creation and editing
- ✓ WebDav integration
- ✓ Document comments
- ✓ Audit trails
- ✓ Full body search

- ✓ Multi-layered permissions
- ✓ Drag and drop move and copy
- ✓ Social integration
- ✓ Document locking
- ✓ File-type Agnostic

Social

Engage teams and spur communication.

- ✓ Personal and group profiles
- ✓ Personal and group activity feeds
- ✓ Social communication
- ✓ Attach documents, projects, contacts and links to social messages
- ✓ Follow people and groups
- ✓ Follow documents and projects
- ✓ Social search
- ✓ Presence

Project Management

Coordinate team effort with project and task management.

- ✓ Create projects
- ✓ Create tasks within projects
- ✓ Task assignment
- ✓ Progress and date tracking
- ✓ Interactive Gantt Chart
- ✓ Task dependencies
- ✓ Import and export tasks
- ✓ Link documents
- ✓ Mobile sync
- ✓ Outlook sync
- ✓ Custom fields
- ✓ Sorting and filtering
- ✓ Personal tasks
- ✓ Task recurrence
- ✓ Drag and drop move/copy
- ✓ Email to tasks
- ✓ Import/export
- ✓ Comments

Contact Management

Manage team and personal address books

- ✓ Personal and Group contact lists
- ✓ Categories
- ✓ Custom fields
- ✓ Link documents
- ✓ Mobile sync
- ✓ Outlook sync
- ✓ Sorting and filtering
- ✓ Import/export
- ✓ Search
- ✓ Email integration
- ✓ List and card view
- ✓ Comments
